Products and Services for the Rail Industry

Baldwin and Francis design robust, high-quality switchgear, which is renowned for its reliability and ease of installation. With over 200 installations throughout the UK rail network, Baldwin and Francis (B&F) are a leading and trusted supplier.

Baldwin and Francis also take pride in offering dedicated after sales support to all customers. From design and manufacturing to installation and maintenance services, we have three levels of support package available, each designed to suit your needs.

These include:

- Onsite staff training
- Regular maintenance visits
- 24/7 Emergency call out
- Guaranteed fixed prices on all parts

Products include:

- Principal Supply Points
- Functional Supply Points
- Auxiliary Supply Points
- Trackside Cubicle
- Uninterruptible Power Supplies
- Transformers

Features and benefits of Baldwin and Francis Switchboards

- “Plug and Play” or existing/new building installations flexible to meet all project requirements
- Robust, high quality design to ensure long service life, high reliability and reduced maintenance
- Up to 3 power sources ensures power continuity in the event of any power source failure
